

I would like to see even more strict laws to keep telemarketers from calling all of the time. I am personally very sick of getting the calls, I try to be nice and tell them right up front that I am not interested but they just keep on. I don't like to hang up on someone but I do because I feel like they are harassing me. That is my phone in my home and I don't want them to call and didn't ask for them to call. Please put more restrictions on telemarketers, they shouldn't be allowed to harass people and waste their time and ours. Thank you
